

One Nation Over God

Devil on your shoulder, pitch fork in his hand

Angel whisperin in your ear,

What s happened to this land?

Remember Philadelphia, 200 years and more

50 founding fathers,

Knelt praying on the Congress floor

Demons: Distract them with temptation, vacation,
frustration, playstation, denomination

Voice from Heaven: Who moved the foundation!

One nation over God, one nation under God

One nation over God, are you leaning left or right

One nation over God, under God, over God

Are we bowing to a grey world,

While God sees black and white

The gangstas gonna get ya, what you gonna do
Lawyers caught our country sleeping back in 1962
School prayer upon their gallows,
1st Amendment in their claws
Without a leg to stand on,
Stole our heritage and laws

Demons: Separate the church & state, reverse debate
Voice from Heaven: Forgive your enemies, bless
them so they change

One nation over God, one nation under God
One nation over God, are you leaning left or right
One nation over God, under God, over God
Are we bowing to a grey world,
While God sees black and white

But if His people bow down
And humbly fold their hands
Pray and turn from their sins
He will heal His hurting children
Bring revival to this land
Where we can seek His face again

While Suburbia wasn't watching
The courtrooms had their say
In the name of *civil liberty*, they've driven God away
New York to California, TV and Web sex reach
Las Vegas and Gomorrah hunt our children while we
preach

Demons: If we tell people the wrong thing enough
times they'll believe it

Voice from Heaven: Commandments

A million unborn babies,
Tossed in dumpsters every year
A thousand willing doctors
Take their money shed no tear
But God sees what we re doing
He weeps with each wrong choice
Who will stop this genocide
If we don t raise our voice

One nation over God, one nation under God
One nation over God, are you leaning left or right
One nation over God, under God, over God
Are we bowing to a grey world,
While God sees black and white *repeat chorus*
